CLEAR GUARD

Your window film care record

Fill this in with your installer before they leave. Keep it with the product care sheet. Use another copy for windows with different products or instructions.

Room and panes covered by this sheet

Installation date

Film name and product code

Side of glass treated

Frame attachment, if fitted

What can I do, and when?

Ask separately about cleaning the film, using an operating window or door, and protecting a newly attached edge. These can have different instructions.

First cleaning date

Cleaner, cloth and method for this film

Instructions for opening or closing the window or door

Care around the frame attachment, including when restrictions end

Before your next window cleaning

Give the cleaner the instructions for these panes. If a date or method is missing, ask the installer before cleaning. If an edge lifts, leave it alone and tell the installer which window it is. An overall photo and a close view can help explain the change.
